

STUDIO COLLECTION

A touch of luxury

To express our passion for materials and enduring products, we've enhanced our distinguished product families Imagine, Hangover, and Invader with premium finishes, introducing the STUDIO COLLECTION.

These luminaries now exude a touch of luxury, featuring front covers in solid crafted metal, aluminum or brass, that elevate both visual appeal and perceived quality while maintaining their original technical features and high lighting performances.

The design showcases starry or wavy patterns on the front of each spotlight, meticulously crafted from top-quality brass and aluminum, ensuring they never compromise the lighting properties. Additionally, the luminaires incorporate top-efficient MICRO DOT optics to enhance their superior attributes, with the highest light control and visual comfort, creating a jewel with an almost imperceptible light source.

The STUDIO COLLECTION represents the a glimpse of how interior design can be elevated thanks to light and light fittings, as the embrace of warmth and textures aligns seamlessly with the overarching philosophy of the Prolicht.
