MAXIMUM FREEDOM OF DESIGN

PROLIGHT
designed to create

SHAPE

Vertical flexibility is now possible with the GRAVITY LIFT technology: each luminaire can be precisely positioned and repositioned, adapting the light composition to changing space needs.

Light becomes responsive, without tools or permanent intervention, continuously adapting to evolving requirements.

GRAVITY transforms the ceiling into a design element. It enables the space itself to be composed through light, creating order, rhythm and visual balance from above. Graphic in nature and flexible in use, GRAVITY can support evolving lighting concepts, adapting to how a space is lived in and used.

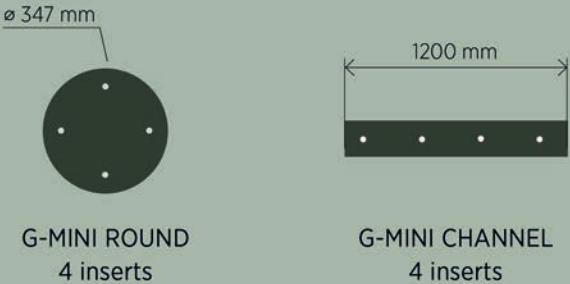

the modular ceiling: g-boards & g-channel

The G-BOARDS form the modular base of the GRAVITY system. Available in linear, round and play versions, they provide four or eight outlets to compose clear, graphic ceiling arrangements. Individual boards can be connected to create larger structures and combined with a wide range of inserts from the PROLICHT portfolio.

g-mini

A compact mini version extends the system for more reduced compositions, following the same logic of precision and control.

inserts

BILO
DIMENSION
H 120: ø 120 mm
LIGHT OUTPUT
356 - 408 lm
POWER
6.4 W
LED / CCT
3500 K, 4000 K

HANGOVER
DIMENSION
H 150 - 450: ø 28 - 75 mm
LIGHT OUTPUT
381 - 1919 lm
POWER
6.4 - 19.5 W
LED / CCT
3500 K

MELT
DIMENSION
H 280: ø 280 mm
LIGHT OUTPUT
220 lm
POWER
7 W
CCT
3000 K

SNOOKER
DIMENSION
H 72: ø 72 mm
LIGHT OUTPUT
283 - 356 lm
POWER
6.4 W
LED / CCT
3500 K, 4000 K
