

PROLICHT at LiGHT26 in London

Press Kit. Götzens, October 2026.

LiGHT26 – Room for new ideas

At LiGHT26, PROLICHT will give its brand promise, “Designed to Create”, a physical expression. The stand centres on the PROLICHT Bento Box, transformed into a walk-through space for inspiration, alongside the company’s latest downlight innovations – including a lighting concept with a beam angle of just 4°.

Good ideas need room: room to experiment, discover and see things from a new perspective. At LiGHT26 in London, PROLICHT invites visitors to explore light as a tool for design.

The inspiration is the PROLICHT Bento Box: a toolbox of colours, materials and finishes for those who shape spaces with light. Originally conceived as a mobile toolbox, it becomes a walk-through space in London – a place to exchange ideas, make discoveries and explore new possibilities together.

At the heart of the stand are PROLICHT’s latest downlight innovations and the question of what can be achieved through precise lighting. How does light change the way we perceive a space? How can it guide the eye – and what role does darkness play?

4° – Designed to Create Focus.

A carefully directed beam of light can draw the eye to a work of art, a sculpture, a distinctive object or an architectural detail. With a beam angle of just 4°, the focus can be placed with precision. What remains in shadow matters too: the interplay of light and dark creates contrast, depth and a clear visual hierarchy.

4° – Designed to Create Focus explores how precise lighting can shape the way spaces and objects are seen.

Theme: Room for new ideas

Focus: The Bento Box as a walk-through space and the latest downlight innovations

Fair: LiGHT26

Dates: 18. und 19. November 2026

Venue: Business Design Centre, London

Stand: 01

About Prolicht:

PROLICHT is an international premium manufacturer of architectural lighting solutions, shaped by a shift in perspective: away from the product, towards people. “Designed to Create” reflects a commitment to enabling creative freedom: PROLICHT develops lighting systems that enable architects and designers to shape spaces in atmospheric, functional and emotional ways.

Rather than the product itself, the outcome of light takes centre stage – spaces that resonate, atmospheres that perform, and experiences that leave a lasting impression. Light is not an object, but a tool for design, mood and transformation. PROLICHT operates as a platform for ideas: flexible light systems, digital tools, fast production and reliable support enable seamless planning, uncompromising quality and results that inspire – fostering creative freedom and meaningful collaboration.

Based in Tirol (Austria), active worldwide.
